

## Landscape Architect

Creative Environments is an industry leader in the design-build process of pool/spa and landscaping in the southwest. We design, construct, and maintain award winning projects in both commercial and residential applications throughout Arizona (Greater Phoenix area, Tucson, Sedona, Northern AZ). Our work has also extended into the East Bay of California (San Francisco/Oakland/Orinda), Southern California (Encinitas/Del Mar/Malibu), Hawaii (Kauai), Costa Rica, Cabo San Lucas, and elsewhere! Our environment is fast-paced, challenging, exciting, and full of learning opportunities as every project we touch is unique. From residential pool/spa landscape, to multi-million dollar custom landscapes, to resorts (The Phoenician, Ritz-Carlton, Four Seasons) to commercial projects (The Biltmore Commerce Center), to community development, we work on everything outdoors: pool/spa, water feature, decking, masonry, utilities, shade structures, casitas/shade structures, custom metal and wood work, lighting, and landscape/irrigation.

As a Landscape Architect/Designer with us, you will:

- Work with clients and design team members to design projects, detail the work to be done, and make sure all designs fit with HOA, City, and County guidelines.
- Enhance the construction coordination process by ensuring plans/pricing provide sufficient information/detail to maintain company margins and construction quality. This will require job site visits, working with Project Managers on job breakdowns, and coordinating with consultants.
- Bid commercial projects. Review all specifications, review/create RFI's as needed to accurately bid work, solicit bids from vendors, and coordinate with the build team to establish accurate bids/schedules/contracts.
- Work with the management team on special projects on all aspects of design, estimating, and project management as needed.

To be successful in this position you should...

- ...have a Landscape Architect degree and at least 5 years experience in the industry. This experience can be in design, estimating, project management or all of the above.
- ...like designing, rendering, sketching, and translating thoughts/ideas into working drawings.
- ...be proficient in construction methods, have an understanding of the build process, and like problem-solving how to build unique design ideas!
- ...understand Microsoft Outlook/Excel/Word. Proficiency in AutoCAD and/or Timberline a plus.
- ...enjoy working in a collaborative and team environment! We have a fun job, and enjoy working together building dream environments.

This is a management position, and will require that you take responsibility for personal and company improvement. You must like working with people, are driven to enhance yourself and those around you. You will report to the Executive Team and must be a good communicator. The position offers benefits and competitive pay (based on experience). In addition, bonuses will be earned based on sales and team improvements.
