

Watermarc Design, a small Phoenix based firm specializing in irrigation design, is seeking an additional irrigation designer. The primary role of an irrigation designer is to prepare irrigation construction documents and coordinate with the landscape architects on each project. We are looking to add a team member who works well in a small team environment, takes initiative, has excellent time management skills, and enjoys the challenge of diverse projects.

This position requires a minimum entry level technical understanding of irrigation water use projections and construction document development.

#### Qualifications

- Knowledge of reclaimed irrigation systems
- Knowledge of spray head layout
- Working knowledge of AutoCAD and Land FX
- Ability to prepare irrigation master plans
- Ability to calculate annual, monthly and daily water use and peak demand
- Ability to calculate system pressure loss
- Conduct site inspections and prepare punch lists

Watermarc offers a flexible schedule and working environment, telecommuting, and a positive mentoring culture.

Interested candidates, please submit a cover letter and resume to Marc Lange at [marc@watermarcdesign.com](mailto:marc@watermarcdesign.com).
